WHATSAPP MARKETING · CUSTOMER DATABASE

TURN EVERY ORDER INTO A REPEAT CUSTOMER

A complete growth system for pizza and fast food brands, prepared for [Restaurant Name]

Presented by [Your Name] · [Agency Name] · [Phone / WhatsApp]

THE PROBLEM

MOST CUSTOMERS ORDER ONCE, THEN DISAPPEAR

No customer list

Walk-in and phone customers leave no record, so you can never reach them again.

No direct channel

Every new deal depends on paid ads and hoping people see it.

Apps own your data

Delivery apps keep customer details, and you pay commission on every repeat order.

The fix: own your customer list and talk to it every week.

OUR SYSTEM

COLLECT. ENGAGE. GROW.

01

Collect

Capture every customer's number at the branch, online and on WhatsApp.

02

Engage

Send videos, deals and promo codes to the right customers at the right time.

03

Grow

Track every code and order, then repeat what works every month.
